Hi Robert,

I've attached a sketch of a design for the basic version of the SeeBoat app. I've also included some starting points for color palates, fonts, and buttons below. This may change a bit, but it's starting point that I've thought through.

Let me know if you have questions about anything or if it's useful to talk through it. I also have a hard copy if that's easier to read.

This color palate:

<http://www.colorcombos.com/color-schemes/137/ColorCombo137.html>

This set of fonts (Lato for headings, Open Sans for smaller text):

<https://fonts.google.com/specimen/Lato>

<https://fonts.google.com/specimen/Open+Sans>

Button style:

something with rounded edges

Also, we should keep in mind that people will be largely using this app in the dark, since the events will happen outside at night. Not totally sure how that will effect things, but just keep at eye on that as you're thinking everything through.

Let me know if you have any questions or need clarification on anything!

Thanks,

Laura
